### **Section E: Preserves, Jams, Marmalades**

Basis for Judging: JAMS are usually made of one fruit crushed or jammed together into a mass of an even soft consistency thick enough to spread easily or be divided into portions. Juices are not separated from fruits and are of a jelly consistency. MARMALADES are soft fruit jellies containing small pieces of fruit or peel evenly suspended in the transparent jelly. PRESERVES are made usually of one fruit, but more than one may be used. The fruit, whole or in large pieces, is cooked in a syrup until clear and transparent, tender, firm, crisp, and well plumped. The shape of fruit is retained. Juice is of a thick, syrupy consistency completely surrounding the fruit. In general, 3/4 lb. sugar to 1 lb. of fruit

used. CONSERVES are a jam-like product of two or more fruits. They often contain nuts or raisins. They are made of very small whole or pieces of fruit cooked or jammed into a mixture of an even, soft consistency. The liquid is jelly-like in character. The name and flavor of the conserve is that of the dominant fruit. BUTTERS are smooth, even, finely grained mixtures of medium soft consistency without seeds or small pieces of fruit and with no evidence of juice as a separate liquid. Butters are usually about 1/2 to 2/3 lb. sugar to 1 lb of fruit.
